

Llaza MAXISCREENBOX

- The cassette shade for exterior protection -

The Maxiscreenbox model is a cassette shade which can act as a solar protector, a screen or a blind. Ideal for large spaces, it can reach dimensions of up to 5 x 5 metres using special fabric and a motorised operating mechanism.

The system uses a cable guide or rod, both of which can be affixed to either the wall or the floor. Maxiscreenbox is a very versatile system that can adapt to the requirements of any project.

Its aesthetic qualities help to make this a product that should definitely be considered as a complement to any new architectural style.

MAXIMUM SIZES

Width	5000 millimetres
Height*	5000 millimetres

*The maximum height for the box system is for specialist fabrics only.
 If 300g/m² acrylic fabric is used, the height is limited to 3000 millimetres.

Two systems of side runners for the drop bar:

8mm thick stainless steel rod

3mm thick braided steel cable

In both cases, and with both options, the runner is fitted to the bracket with a bolt and stud or retaining bolt.
